

# FUNCTIONAL MINERALS FOR YOUR NEEDS

From raw material  
sources to high  
quality products

# WHO WE ARE.

## VALUE CHAIN CHAMPION.

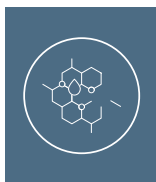

The association and brand name euroMinerals was formed out of a cooperation between the companies euroMinerals GmbH (Austria), Calmit GmbH (Austria) and Cales de Llierca S.A. (Spain).

**We are your specialists in the development and production of industrial minerals with mastery from raw material to final product.** A common ownership and collective sales force enables the euroMinerals mission, to make customers' needs the top priority, by offering a corporate product portfolio – from talc, dolomite and composite products to precipitated calcium carbonate and lime – suitable for various distinctive industrial applications.

## YOUR APPLICATION – OUR RESPONSIBILITY.

**COATINGS & INKS:** Whether it is in wall paints for the interior or exterior, in lacquers, plasters or car body refinishing, our industrial minerals are not just a filler but a functional performance extender in your formulation, which can lead to numerous positive properties in terms of optical appearance, rheology, weathering, cracking and sandability.

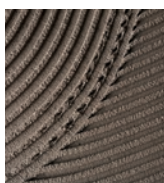

**POLYMERS:** For automotive parts, household appliances, packaging films for food appliances or in window profiles, our products are used due to its outstanding properties, among others, for improving e.g. stiffness, dimensional and color stability as well as weather resistance.

**HEALTH CARE:** Specific products for pharmaceutical, food and cosmetic industry are produced with compliance to well-known international standards.

**SPECIALTY PAPER:** Our products are not only suitable as a filler in the paper and packaging industry. They are also used as a coating pigment and pitch & sticky control agent.

**ADHESIVES & SEALANTS:** High-performing products for automotive industry as well as construction DIY market, flooring, roofing, glazing, photovoltaic and aerospace industries.

**SPECIAL APPLICATION:** If your application is unique, this is our business area especially for you. Special developments tailored to our customers' needs are what we are striving for.

## COMPLIMENT TO WHAT COMPLEMENTS – OUR PORTFOLIO.

### **inbond**

Performance compound for partly replacing  $\text{TiO}_2$

### **intalc**

White, hydrophobic, flexible, soft - high quality talc

### **inlime**

Ultra fine and highly reactive quicklime and hydrated lime

### **indolo**

Dolomite - more than a simple filler

### **inpcc**

Tailor-made precipitated calcium carbonates for every application

### **incomp**

Low viscosity extender

### **inzeo**

Innovative qualities – natural clinoptilolite zeolite

## R&D. ONE STEP AHEAD.

Innovative products are the basis for a successful future. To achieve this goal, our **Research & Development** department works closely with research institutions and also has a close working relationship with our customers because they know best what they need. It is important to recognize the latest trends and developments in the market and to create individual projects in conjunction with the needs of our customers.

## OUR SERVICE. YOUR BENEFITS.

### **SAVE UP FASTER**

Cost saving through functional extension of fillers and pigments.

Optimized processes through outstanding raw materials.

### **SPECIAL FOR YOUR BUSINESS**

Tailor-made products for tailor-made applications.

Sophisticated laboratory to ensure consistent high product quality.

### **NAME IT - WE DELIVER**

We provide all the common logistic solutions for our customers.

Different packaging variations and all common transport options.

### **LOOKING FOR:**

High-quality products | Flexibility | Technical support | Tailor-made solution | Reliable long-term supply  
Then, **EUROMINERALS IS YOUR BEST CHOICE.**

# SUSTAINABILITY APPROACH

Among the whole value chain, it is euroMinerals philosophy to care and be accountable for

- the resources we use and the effect of our decision and actions on the environment,
- the people we work with by ensuring fair, health and safe labor conditions,
- the sophisticated and innovative production processes we use to offer a product portfolio at highest quality standards,
- the fair and transparent business practices we have in place,

while performing efficient and achieving economic growth.

We can just generate as much as sustainable value and success out of our business, as much as environmental and social responsibility we aim.

Generating success collectively and sustainable is the future, euroMinerals approach. Our management systems are certified and comply with **quality, environmental and occupational standards**.
